

# DILLIMAX TL

High yield strength fine grained structural steels

With close tolerances on dimension and shape

## Specification DH-E48-D, edition April 2016<sup>1</sup>

DILLIMAX TL steel plates are delivered with very close tolerances on dimension and shape. These close tolerances are for example necessary for telescopic booms.

# **Product description**

This specification can be specified for the following steel grades in addition to the DILLIMAX data sheets of Dillinger or EN 10025-6:

• DILLIMAX 690 B/T/E (S690Q/QL/QL1 according to EN 10025-6) • DILLIMAX 890 B/T/E (S890Q/QL/QL1 according to EN 10025-6) • DILLIMAX 965 B/T (S960Q/QL according to EN 10025-6)

• DILLIMAX 965 E

• DILLIMAX 1100

The steel is designated as e.g. DILLIMAX 965 T TL or S960 QL TL.

Other specifications may be possible on request.

DILLIMAX TL plates can be delivered in the following dimensions:

Plate thickness t [mm]	Width B [mm]	Length L [mm]
$6 \le t < 8^a (0.25 \text{ in.} \le t < 0.30 \text{ in.})^b$	$1\ 000 \le B \le 2\ 500\ (39\ in. \le B \le 98\ in.)^b$	
$8 \le t < 9.5 (0.30 \text{ in.} \le t < 0.37 \text{ in.})^b$	$1\ 000 \le B \le 3\ 200^{\circ}\ (39\ in. \le B \le 126\ in.)^{b}$	$2\ 000 \le L \le 18\ 000$
$9.5 \le t < 15 (0.37 \text{ in.} \le t < 0.60 \text{ in.})^{b}$	$1\ 000 \le B \le 3\ 300^d\ (39\ in. \le B \le 130\ in.)^b$	$(79 \text{ in.} \le L \le 708 \text{ in.})^b$
$15 \le t \le 25 (0.60 \text{ in.} \le t < 1.00 \text{ in.})^b$	$1\ 000 \le B \le 3\ 300^{e}\ (39\ in. \le B \le 130\ in.)^{b}$	

DILLIMAX 1100 for  $t \ge 8 \text{ mm } (0.31 \text{ in.})^b$ 

b The approximately converted values in brackets are for information only.

<sup>&</sup>lt;sup>c</sup> 3 050 mm (120 in.) <sup>b</sup> for DILLIMAX 890/965 and 2 500 mm (98 in.) <sup>b</sup> for DILLIMAX 1100

<sup>&</sup>lt;sup>d</sup> 2 500 mm (98 in.)<sup>b</sup> for DILLIMAX 1100

<sup>&</sup>lt;sup>e</sup> 3 050 mm (120 in.)<sup>b</sup> for DILLIMAX 1100

The current version of this material data sheet can be found on <a href="http://www.dillinger.de">http://www.dillinger.de</a>.

## General technical delivery requirements

Unless otherwise agreed, the general technical delivery requirements in accordance with EN 10021 apply.

#### **Tolerances**

#### Tolerances on nominal plate thickness

For TL plates, the very close thickness range  $\Delta$  (upper value – lower value) is distributed as given in the following table. Other distributions of  $\Delta$  e.g. as in EN 10029 can be agreed.

Nominal thickness t [mm]	Lower limit of thickness [mm]	Upper limit of thickness [mm]
6 ≤ t < 16	- 0.2	+ 0.4
$16 \le t \le 20$	- 0.3	+ 0.5
20 < t ≤ 25	- 0.3	+ 0.8

The difference in thickness along the bending line (axis in rolling direction from tip to toe of a plate) does not exceed 0.3 mm  $(0.012 \text{ in.})^2$ .

#### Tolerances on width and length

Unless otherwise agreed, the tolerances will be in accordance with EN 10029.

#### **Tolerances on flatness**

The following tolerances on flatness apply:

- $3 \text{ mm} / 1 \text{ m} (0.12 \text{ in.} / 3.3 \text{ ft})^2 \text{ for a corrugation } \leq 1 \text{ m}$  (\leq 3.3 \text{ ft})^2
- $4 \text{ mm} / 1 \text{ m} (0.16 \text{ in.} / 3.3 \text{ ft})^2 \text{ for a corrugation } > 1 \le 2 \text{ m}$  (> 3.3 ft \le 6.6 ft)<sup>2</sup>
- 5 mm / 2m  $(0.20 \text{ in.} / 6.6 \text{ ft})^2$  for a corrugation > 2 m  $(> 6.6 \text{ ft})^2$

A maximum of 2 ripples or corrugations per m (3.3 ft)<sup>2</sup> of plate length is allowed. A ripple or corrugation is defined as a flatness deviation > 1 mm (>0.04 in.)<sup>2</sup>. The flatness control is carried out on a flat support according to EN 10029 using a 1 m (3.3 ft)<sup>2</sup> - or 2 m (6.6 ft)<sup>2</sup> - levelling staff.

#### Surface quality

Unless otherwise agreed, the specification will be in accordance with EN 10163-2, class B2. Steel grid blasting and shop primer can be agreed.

<sup>&</sup>lt;sup>2</sup> The approximately converted values in brackets are for information only.

## **Identification of plates**

Unless otherwise agreed the marking is carried out via steel stamps with at least the following information:

- steel grade (e.g. DILLIMAX 965 T TL)
- heat number
- number of mother plate and individual plate
- the manufacturer's symbol
- inspector's sign

#### **General Note**

If particular requirements are demanded and not covered in this specification, please contact us with the specifications for our review and agreement prior to ordering. The information in this specification is a product description. This specification is updated at occasion demands. The latest version is available from the mill or as download at www.dillinger.de.
